

Leading the AI-Native organisation

Build the confidence to lead & invest wisely in the age of AI

Learn to avoid common pitfalls (AI Value Gap, Hype vs. Reality & PoC Graveyard) to bridge the AI Chasm. This requires an AI-Native operating model structured around four key elements:

- **Organisational Catalysts:** igniting change, aligning AI initiatives & driving transformation
- **Enabling Capabilities:** gaining necessary skills & infrastructure to implement AI solutions
- **AI-Empowered Agility:** enabling rapid adaptation to insights and market changes
- **Human-Centric AI Culture:** unleashing your organisation's full potential by fostering an environment where technology enhances human creativity and productivity

In this structured working session, Senior leaders use a shared framework to align on priorities, make decisions, and commit to next steps, with their organisational context driving the discussion.

WHAT YOU'LL LEARN

- How to prioritise what's strategically meaningful versus hype
- How to set budgets and governance that don't slow progress or invite risk
- How to shape a culture that embraces AI rather than fears it
- How to build a realistic path toward an AI-Native operating model across strategy, workforce, data, technology, and governance without chaos or waste

COURSE DETAILS

Duration: 1 Full day (in-person or remote)

Certification: AI-Native Leader, renewed yearly.

WHO SHOULD ATTEND

- **Senior leaders** with P&L responsibility
- **Business unit leaders, PMOs, and transformation sponsors** seeking to align AI initiatives with strategy
- **Anyone** who must evaluate, approve, or manage AI initiatives across their enterprise
